Lucas Zhu

✉ alucaszhu@gmail.com 📞 610-585-1891 📍 Philadelphia, Pennsylvania ↖ lucasz-hu.github.io

Skills

Proficient: Java, Python, Git, HTML/CSS, Advanced Google Search

Familiar: C, Node.JS, JavaScript, React, MySQL, Adobe Suite, Fusion 360

Education

2019 – 2023   **Computer Science,** University of Pittsburgh
Undergraduate in Bachelor of Science
Minor in Economics
Relevant Coursework: Intermediate Object-Oriented Programming with Java, Algorithms and Data Structures, Discrete Structures, Assembly, Computer Systems

Projects

07/2021 – present   **NBA Handicapping Model,** Github ↗
- Engineered a handicapping model that produces a prediction of overall winner in a given NBA matchup
- Utilized four factors of basketball as well as momentum and value strategies to account for overall team performance and hot/cold streaks; built with Python

08/2021 – present   **Personal Portfolio Website,** Github ↗
- Designed and coded a website to showcase my previous projects
- Built with HTML/CSS and Bootstrap 5, hosted on Github Pages

07/2021 – present   **History Game,** Github ↗
- A high or low-inspired game that uses historical dates to test your historical knowledge
- Built with Python

03/2020 – 08/2020   **BitBots.trade**
- Independently launched an online trading bot that exchanges bitcoin for in-game currencies, as well as an accompanying website
- Developed backend using a Bitcoin API, bcoin, Node.JS, and MySQL while customers interacted with the bot through the Steam platform
- Transacted $1000+ of customer currency with 50+ users

Professional Experience

05/2019 – 08/2019   **Serving Assistant,** DanDan Restaurant
- Helped restaurant servers create an enjoyable dining experience by preparing tables for guests and serving food.
- Translated between Mandarin-speaking kitchen and English-speaking front of house.
